THE DAM

by Berhanu Rabo

Ethiopia and Ethiopians are the most hospitable and loving heroic people across the history of human being. The people welcome every person regardless of race, color, and religion without any discrimination. Love, equality, respectfulness, dignity, hospitality, humbleness, and freedom seeking was at the heart of every Ethiopians. It is in a long-lived culture of Ethiopian society to leave their seat for the guest and elderly, to offer their flat to the guest, to provided their guest with what even they don't provide to themselves. Still currently, regardless of the stupid political games the stupidest are playing in the country, Ethiopia is one of the most welcoming and peaceful country compared to any country in the world.

Dear, Valued Readers

First and for most I would like to thank you for taking time from your precious time to read our monthly newsletter Green Fire. On behalf of the Green Fire newsletter editorial team, and the parent company Motion Consulting & Training Staff it's my pleasure to provide you this newsletter free of charge.

Our editorial team has worked hard in producing this newsletter with all the information that we believe will be a value to your life. Green Fire is produced by Motion Consulting and Training PLC and distributed via email, and through our Telegram channel as well as Facebook page monthly.

If you have any comments, questions, or you would like to contribute to our newsletter, just send us an email.
greenfireNL@gmail.com

Thank you

MOTIONS' ASPIRATIONS (MA)

By Abebe Legesse (CEO of Motion Consultancy & Training PLC)

Aspiration is like a fuel. It drives the motives. Motives on the other hand are energies that helps to accomplish tasks. Companies, societies and individuals without aspiration are like engines without fuel and Unignited fuel is like sleeping human who is far from action and impact. So, aspirations and motive are inseparable, one without the other is impact less. Aspiration is the foundation for motive and motive are the energies for action. Accordingly, Motion aspires the following to happen;

Critically Thinking and Action Oriented Individua's (CTAOI): - Critical person hardly commit mistake, even if committed critical person is conscious about the mistake and hardly repeat it. Besides, critical person is action oriented, thus, is rich in experiences. Critical person is full of wisdom, celebrates the outcome of own thoughts and actions, never regrets about the outcome. Unlike the reckless, critical person lives in today and works for better tomorrow. The reckless live in tomorrow and yesterday's illusion and lost in the status quo. A society/country blessed with critical thinker and action-oriented individuals always make lovable moment and history that everybody aspires to be part of.

Responsible and Integral Society (RIS): - Responsibleness is about understanding, it is also about self-esteem. Understanding is power, it is dignity, it is courage to act with full responsibility. Without understanding, integrity is only a wish, integrity is the highest level of understanding, thus it is the highest level of human dignity. Responsible and integral society is an assurance for peace and security. Living in such a society is always admirable.

Secure Environment (SE): - Security is the foundation of life to exist, otherwise life would be threatened and become futile. Human being is created to live in a secure environment, that is why all that ensures our security are naturally out there, in form, parent, Elder, … However, if not maintained with its pristine constituent, the environment cannot be comfortable and offer security. Therefore, Motion aspires that Human being lives in an environment very consciously and carefully to be secure and ensure life's harmony with its environment. Hence, Motion relentlessly works to create and safeguarded, secured

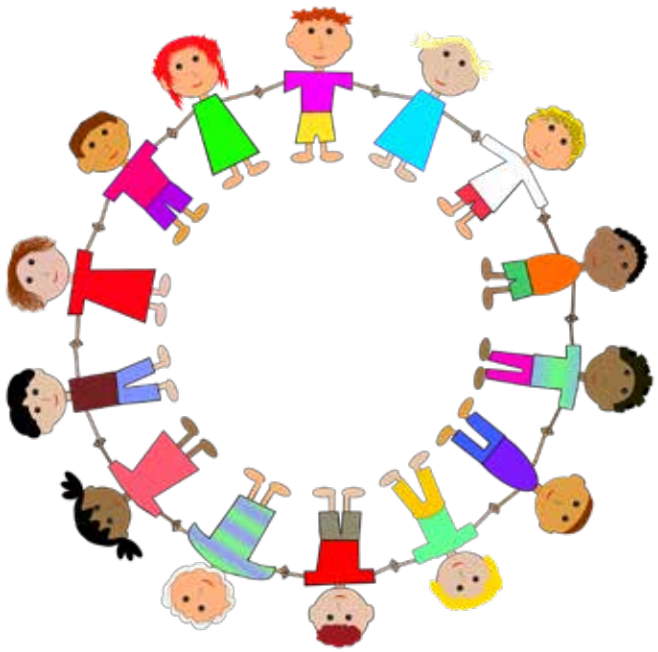

Continued on the next page

MOTIONS' ASPIRATIONS (MA)

continued from Previous page

environment to its best capacity for its self and all mankind across its walk of life.

Trusty Relationship (TR): - Trust is like a light of life. It illuminates the inner psyche with love. It is also like a spirit of eternity that reinforces and support the thought of human kind. The contrary to trust is like a rust. Rust decomposes better thought, and weakens once determination and strength and disable actions. Rust as opposed to trust, propagates procrastination and hesitation not only in action but also in thought. Thus, relationship with out trust is only temporary, and is just a life's rust, and cannot lead to the ultimate joy and beauty of life. Accordingly, Motion encourage trust and discourage rust in all its intra and inter relationships.

To realize the above illustrative aspirations, Motion endeavour to engage in the following actions as part of its corporate Social Responsibilities (CSR).

Hope Building Endeavor (CBE): - This Endeavor targets new generations from nursery to undergraduate university students and youth (both employed and unemployed). New generations are the hopes by themselves to their families and the country at large. To realize this endeavour, the target citizen needs to be crafted in the manner they can envision bright future and hospitable world. So far, Motion has been exerting its utmost efforts to inspire and motivate the new generation through its serious of training workshops and sharing life experiences. The endeavour is progressively expanding in terms of area coverage since its commencements. It is designed in a cyclic manner by which impact of the effort is reviewed every three years and advancement is made based on lessons learned and continuous feedback from the beneficiaries. The endeavour is initiated two years ago and so far, Motion reached out to six universities, four privates' academic institutions, one public school. Apart from these efforts, Motion reached out to millions through its presence at more than six TV stations and six FM radio stations.

Trust Building Endeavour (TBE): - The contemporary dynamism in all aspects of humans' life is full of uncertainty and hardly predictable. Individuals and institutions become more sceptic about others as every move is becoming selfish, self-centred, Exploitative and deceptive. This is affecting the decision making by individuals and also institutions. Without decision or with wrong decision there could be no aspired outcome. Thus, targeting institutions (GO, CBO, and NGO) Motion have been implementing this endeavour for the last four years. Similar to the hope building project, this endeavour is also cyclic and its impact is designed to be reviewed every five year and advances to the next cycle based on lessons learned. So far specifically Motion reached out to Seven Go and Five NGO Initiation through its Motivational and skill trainings as part of this endeavour.

Culture Building Endeavours (CuBE): - Culture is about discipline, it is about Norms and values. Society in general and institutions in particular, without norms and values tend to be wild and rootless. Undisciplined society/ institutions also are fragile and cannot last long. Societies/Institutions without enshrined culture could be suppressed and eliminated. The important safeguarding mechanism is

Continued on the next page

MOTIONS' ASPIRATIONS (MA)

continued from Previous page

through maintaining/ reinforcing generally accepted beneficial cultures or introduction of morally, legally, and scientifically acceptable culture. This endeavour targets the wider community and business entities, and has been under implementation since the last six years. The endeavour has been in execution through organizing weekly experience sharing's, Professional dialogues, Trainings and demonstrations. Similar to the other endeavour, it is also cyclic and reinitiates every five year. The first cycle was completed during the year 2019 and currently Motion is running the second cycle of this endeavour. During the first cycle over 10,000 individuals of various academic, experience and skill background has been addressed through face to face interaction.

Relationship Maintenance Endeavour (RME): - During this contemporary world, many relationships cracks, spoils or disintegrates. This affects Hope, Trust and culture of a society, Institutions as well as individuals. Particularly when it comes to family level it poisons the generation in the line. Thus, Motion have been counselling and maintaining challenged relationships, particularly of soul mates in a family. Unlike other endeavours this endeavour is neither cyclic nor progressive. Motion only responds to needy individuals or groups. It has been under execution for about three years and So far, Motion saved more than 100 families from disintegration directly and in a number of thousands indirectly through its presence in both social and mainstream medias indirectly.

The above endeavours have been reached out to the society without any charge as part of Motion's Corporate Social Responsibility (CSR).

THE DAM

continued from page 1

All problem we have is not because of Ethiopians intrinsic culture and behaviors unlike the rest of the world. We have inherited/imported odds from the so called developed world than the technology and other stuff we have imported. We send them our organic product and imported from them their inorganic and junks that is good for nothing including the environment.

In the rest of the world, everything is artificial and junk. This force them to live a life that is full of hurry, stress, and hopelessness. Their race is always to outlaw the way nature is operating, and replace with damaging human made artificial world order. That means, the planet was perfectly ordered, and now humanly race is shifting it to imperfect and disorder. While nature is cute and perfect, they try to destroy it and funny enough also try to rebuild it-that is artificiality is in the making. Once nature is reoriented in the wrong way, and human start to treat human as a tool and material stuff, there is no earthly skill that can manage to undo it. Society's system is not a simple machine system that can human do and undo easily. Hence, it is very important to reconsider the nature based original world order before rushing to the weak human made new world order.

The way the current world is operating is all artificial. The food, the love, the peace, the war, even the body and soul are artificial. The nation free of such colorful artificial inhuman life is now cornered and very few in number. We Ethiopians, are one of such very few nations in the world. We are not modified and re-modified in ungodly manner. We are people of GOD. We are original and peace loving. We are original and living by accepting most of what GOD gave to us in a calm and humanly way. Our food is organic and not junk, our peace is original and not gun made peace, our love is original and not part of business, even our war is original and is not conspiracy made war, our body and soul is also original and not polluted and corrupted by discrimination and self-centered race for self-benefit, ignoring and ridiculing humanity.

Hence, the 21st century war Ethiopia is facing is the war between original nation and the artificial nation, the human and the inhuman, the GOD loving and the GOD hating, the rational and the irrational, the truth and the false, etc. The evidence for this is while Ethiopia is an icon of freedom, it is the colonialist that proud of themselves their slavery act, while many colonialists were wandering here and there to scramble Africa and other nation Ethiopia is the only nation that said 'NO' to inequality, racism, unfairness and colonialism in the world. Yet, no nation interested to narrate this history. Because, the planet is unfair and always stands by the evil and their own conspiracy. The country which is an icon of freedom is now under the pressure of those colonized and colonizer for its daily need. They pretend to be democrat and fair while still put their eye's on Africa to scramble as they used to. Understanding this is the departure for Africa to develop its own way, and use its resources (physical and human) for its own people. Ethiopia is the pivot and center of play for this agenda, and that is why under the pressure of devil and devil advocates.

THE DAM

continued from Previous page

As we Ethiopians are holy land and struggle to say no to the 'devil and its advocate' we are always number one target to the sward of the devil, and we are always symbolized by the worst thing on earth uniquely so that the campaign of the devil, the mission of the devil and its advocate could be accomplished. Here comes the truth, why even we are begging to use our own resources. This is the reason while the agenda of our development reached to UN Security Council as a threat to security for the first time in the history of the world. How development can be a threat to security? That means, if Ethiopia developed it is not the development, but Ethiopia that could be a threat to security. Since, the artificial world knows, the center of the power, the GODLY country, they always try to belittle it. Ridicule it. But, now is the time and it is not possible to stop Ethiopians to develop and save the drowning nation.

Therefore, the GERD/Great Ethiopian Renascence Dam is realized against all effort made by the devil and devil advocate. The dam is not a big dam in relation to the history and charisma of the country. The GERD is just a signal. The water tower country will shine soon, not only to itself but also the whole planet. The next biggest dam, ever, we need to build is to build a value dam, a love dam, a freedom dam, a respectful dam, a trustworthy dam, a cultural dam, a spiritual dam, an organic dam, a humanly dam, a collaboration dam, and give it to the world and light up the whole world. This shower of light that will be sourced from Ethiopia will turn the tasteless world into a tasty world. It is not possible to call this paradigm the new world order. This is the old-world order, we are destroyed to come up with the greedy, artificial, materialistic, and devilish new world order. The dam that light up the world through its humanly fill and humanly feeling will come soon. Let's stay and see the center of the power, the water tower, the center of love and respect, the cradle of humanity; Ethiopia coming up in all earthly and heavenly charisma.

NB: In memory of the first-round filling of GERD (4.9BMC in only 15 days.) truly water tower filled its self for the first time.
