# Self-Control

**by Abebe Legesse**

Whether it is natural or human induced, the universe is structured in hierarchical way. In hierarchy there is a control and order. Anything without control and order is a thing that cannot persist and/or perpetuates rather it is a stuck or it is a self-destroying entity of the universe. So that, self need to be controlled both naturally and personally in order it persists and also perpetuates. Vertical physical growth of human for example is controlled and limited at certain extent naturally and side physical growth need to be controlled and limited personally based on our interest and effort.

'Self' is many in one and one in many as briefly presented in GF Vol 7. Self-control is an effort to perform better every day and earn more in multitude aspect of live and score more success every day. In the context of this article, Self-control is an effort of enhancing, improving and limiting personal appearances, attributes/ traits/ characteristics based on personal interest and efforts. Thus, one who may not bother about living as an ordinary or below average life may not worry about self-control.

Self-control is only an illusion if self is not properly apprised and understood. In self-appraisal we should identify and list appearances, characteristics/ traits, habits etc that describe us. This can be aided by thinking about our qualities/ abilities/ talents/ strength, weakness/ pitfall, challenges/ Adversity, allergies/ dislikes, likes etc and/or by thinking how others understood and describes us or said about us. Also, evaluating whether what others said about us or the way they described us is correct or is a mis understanding. If it is misunderstanding why others understood us wrongly, etc.

Once our characteristics/ traits/ habits listed, we need to categorise it in to groups such as qualities/strength, Weakness, likes, dislikes etc. Then follows the application of the self-control measures including; maintaining, improving, enhancing, avoiding and etc. In the process of self-control, qualities need to be maintained or

enhanced, weakness need to be remedied, likes should be intimated, dislikes should be avoided/distanced etc. The key query in this regard and related to the self-control is how and how far/how much we need to enhance/ remedy/ intimate/distance our known appearances, and traits. If the extent/magnitude of exercising our known traits are not known and limited to/at certain level/magnitude, certain qualities may turn in to weakness, likes may turn in to dislikes etc.

For the sake of this article focus is given to personal qualities. Although qualities are personal, there are certain traits that are regarded as common qualities to all humans due to the broad range of benefits derived out of them if they are controlled and properly exercised. If qualities are not controlled and properly practiced there is a high risk that it tuns in to undesirable traits. For instance, there is a risk that calmness without activity can make us ineffective, Effectiveness without compassion can make us robotic, Kindness without wisdom can result in being abused.

Below is an indication of common personal qualities and the risk attached to it if not controlled.

**Confidence: -** it is a faith in our abilities. However, there is a risk of overconfidence which has a risk of blindness and rigidity in it.

**Sociability: -** it is about connectedness and relationship; but there is a risk of selflessness and being lost in it.

**Patience: -** is about tolerance and persistence. But if not controlled there is risk of being succumbed.

**Resilience: -** is the ability to get back following failure, it about keep going through difficulties. But if not controlled it could lead failure to admitting mistakes.

**Drive: -** is about why in life, is energy, insightfulness. If no controlled there is risk of dissatisfaction and desperateness.

**Commitment: -** is about determination and focus. If not controlled there is a risk of loss of opportunities and frustration.

**Passion: -** it is what motivates us to next challenge because of our understanding about its interesting other side. But if not known and limited, there is risk of unnecessary sacrifices of life and life assets.

**Integrity: -**it is about being honest open and transparent. But if not controlled and have no limit then there is a risk of being abused by others.

**Optimism: -** is the mentality of approaching difficult situations positively and with open mind. But if not controlled and limited there is risk of being illusive and unrealistic.

The above description shows that, if qualities are not controlled it could turn in to undesirable chain of traits. Uncontrolled quality could turn in to pitfalls, if pit falls are not controlled it turns in to challenges, if challenges are not controlled it turns in to allergies. Further on this shall be presented in the next version of GF.

# THE PLACEBO EFFECT

by Yonatan Gena

How many of us have heard about the placebo effects? It is very interesting what researchers are finding new things everyday about it.

**What Is the Placebo Effect?**

The idea that your brain can convince your body a fake treatment is the real thing best decribes what Placebo effect is For instance, a person's symptoms may improve or they may have what appears to be a side effect from the treatment. These responses are known as the "placebo effect."

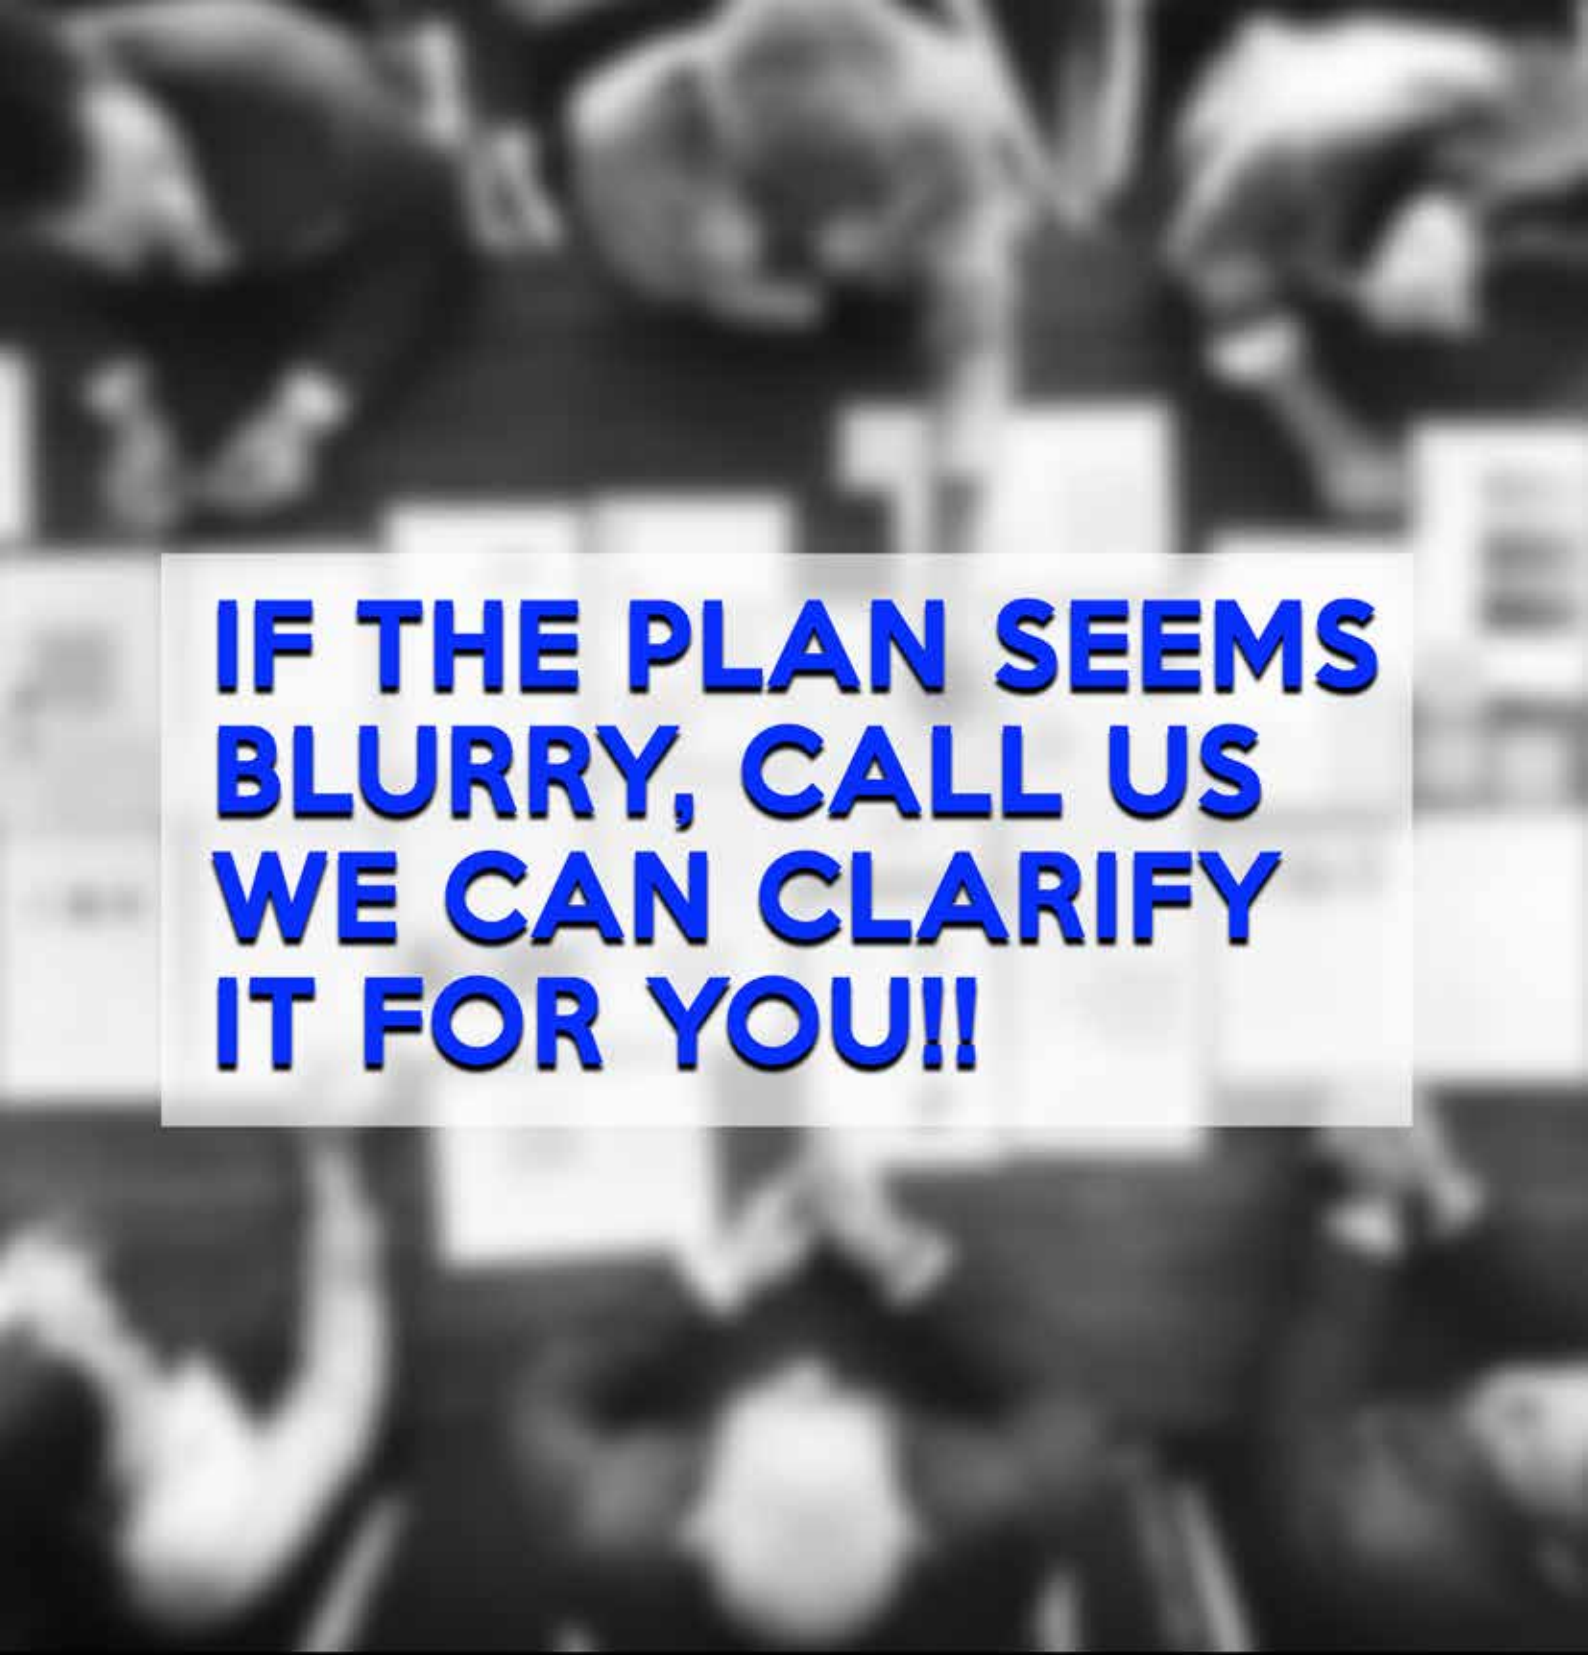

Studies show that placebos can have an effect on conditions such as:

- Depression
- Pain
- Sleep disorders
- Irritable bowel syndrome
- Menopause

Its also intriguing to learn how powerful our belief is. People are showing placebo effects because they have a new strong belief system when they are provided with this small sugar pill. The researches done

on the topic indicate that learning the power and harnessing it would have far more benefits than just getting cured from a disease. For our personal intake, learning how to shape our beliefs in general have benefits that we have never imagined even in our wildest dreams.

## DO YOU HAVE TOTEM?

**by Berhanu Rabo**

An animal totem is a symbolic representation of your animal guide. It can be represented in the form of a totem pole, talisman, emblem, crest, statue, or jewelry. A totem can symbolically represent a whole group of like-minded people, a family lineage, or an individual. Animal Totems and symbols are carved and painted on to long wooden poles that represented the emblems of clans or families and relate to their belief in Totem-ism. Animal totems were believed to have spiritual significance and watched over the family, clan, or tribe symbolizing their guardian spirit or helper. Totem poles serve as important illustrations of family lineage and the cultural heritage of the Native peoples in the islands and coastal areas of North America's Pacific Northwest, especially British Columbia, Canada, and coastal areas of Washington and southeastern Alaska in the United States.

As nature is so integrated and operate in harmony learning from all the particle of life and keeping our rhythm with all creature is the most important wisdom to use in our life. To understand such a beauty of nature and live a holistic life with and within all creature on earth, the following illustrative are presented for the sake of this article.

Owl is one of the rarest spirit animals. If you happen to cross paths with an owl, it is a true sign from the universe. The owl as a spirit guide that represents wisdom, deep connection, and intuitive knowledge. Accordingly, one can make an owl its spirit animal to uphold such attributes in the way of life.

**The Descending Dove**

The Holy Spirit in the form of a dove descended upon Jesus at His baptism in the river Jordan. In Christian art doves are used to symbolize purity, peace, and reconciliation.

The Holy Spirit is now most often depicted in the form of a descending dove. Hence, associating ourselves with dove can help us to exercise such beauty to which dove is symbolized for. Lion on the other way is a very diverse symbol. Its most common traits are: majesty, strength, courage, justice, and military might. Commonly referred to as "the KING of the beasts," it is a symbol of Kingly power and might, but as the lioness it is commonly related to the Great Mother and protection. The lion also symbolizes the following: courage, justice, power, strength, wisdom, pride, dignity, dominating, authority, material wealth and riches. In regards to the spiritual message, the lion brings with it the need to stop over stretching ourselves but try to balance matters and remain strong.

Historically, serpents and snakes represent fertility or a creative life force. As snakes shed their skin through sloughing, they are symbols of rebirth, transformation, immortality, and healing. Understanding this making this animal as our symbol has a lot of benefit for the way we understand life and deal with in all faces of our life. In the other way, Dragon is a symbol of evil, in both the chivalric and Christian traditions. In the Orient, it symbolizes supernatural power, wisdom, strength, and hidden knowledge. In most traditions, it is the embodiment of chaos and untamed nature. The turtle is a sacred figure in Native American symbolism as it represents Mother Earth. The meaning of the Turtle symbol signifies good health and long life. The turtle has great longevity living up to 150 years. The hard shell of the turtle represents perseverance and protection. The turtle also represents truth, which is one of the Seven Grandfathers' Teachings on how to live a balanced life-the other six are wisdom, love, respect, bravery, honesty and humility. The turtle represents being true to yourself, to others and being truthful in everything you do.

Dogs were depicted to symbolize guidance, protection, loyalty, fidelity, faithfulness, alertness, and love. As dogs became more domesticated, they were shown as companion animals, often painted sitting on a lady's lap. Moreover, Dogs being able to sense death is nothing new. In fact, dogs have been sensing death, alerting people to oncoming death, and even sniffing out those already dead for centuries. However, due to their acute senses, dogs are able to pick up on the sounds and smells that are associated with oncoming death. When a pet owner dies, there's normally a shift in the routine care of the dog or cat. Sensing the absence of his human companion, a dog or cat may show signs of depression or anxiety over this loss of familiarity. It is also thought that dogs can smell fear and stress even when there are no other signs.

A dog can smell the surge of hormones created by stress - including adrenaline and cortisol. In some cases, the dog has detected the increase of stress before their owner has even realized. Dogs have an incredibly sensitive sense of smell that can detect the odor signatures of various types of cancer. Among others, they can detect colon cancer, prostate cancer, breast cancer, and melanoma by sniffing people's skin, bodily fluids, or breath. If you think your dog looks stressed out, it might be your own stress levels that are affecting your pet pooch. A study published in Nature's Scientific Reports shows pet dogs may synchronize their stress levels with those of their owners. Depending on many things, such as the wind and the type of scent. Under perfect conditions, they have been reported to smell objects or people as far as 20km away.

**"What is the universal symbol for God?"**

**What is the universal symbol for God?**
The universal symbol of GOD is: circle

The circle is a universal symbol with extensive meaning. It represents the notions of

totality, wholeness, original perfection, the Self, the infinite, eternity, timelessness, all cyclic movement, God ('God is a circle whose center is everywhere and whose circumference is nowhere' (Hermes Trismegistus)).

Although we are not cognizant of what type of flowers we need to use for what purpose, depending on the culture of different society the color of flowers conveys its own meaning. A deep or hot pink rose can convey gratitude, appreciation, recognition and is a great way to say "thank you," while a light or pale pink rose conveys grace, gentleness, joy and happiness. The white rose is used in funeral arrangements to convey innocence and youth. They can also denote reverence for the person who has passed. Although sympathy flowers have meanings that can change from country to country, white roses remain a popular funeral flower.

We have just touched up on some of the amazing nature's relation with our daily life and show our connections too. We recommend you to go more detail about the nature's beauty of integration into our life and make use of them as your totem.

# Reasons

**By: ROTSI Group (Tsenat Berhanu & Robel Berhanu)**

**The planet earth is a place full of tragedy and terrifying things as it is full of beauty. People kill each other, kill themselves and do other horrible things. We call these people murderers and all the bad things. What you should know is that these people didn't choose this life. They were pushed into it. Long story short, some people are the reasons for the bad guys' existence. It's not a specific kind of reason. It's the snowball effect.**

**When you roll a snowball down a snowy hill it catches on all the snow and hit the ground as a huge snowball. When a person gets mad about something and commit suicide, it's not because of that thing only. It's because he's done about everything around him. So please watch your mouth. You might be putting someone's life in risk. And since you don't have anyone's life as a property, you can't bet on it. You should learn to be the reason of someone's existence. If not, at least don't be someone's reason of dying.**

**Being someone's reason of living is like being his light in a dark path. But you shouldn't be too much of it. Because even a light can be blinding if it's more than needed. It's enough if you give a person a small spark of hope. Whose light, are you? Whose gun, are you? Ask yourself that.**
